PROFESSIONAL SUMMARY

Final Year B.Tech IT student specialising in Java backend development with Spring Boot 3, distributed systems, and cryptography. Hands-on experience building production-grade microservices, RESTful APIs, and encrypted fintech systems — including a **1-month industry internship** at Kaynaz Technologies. Proficient in OOP, concurrency, system design, and Agile workflows. Seeking a **Java Backend Internship or Full-Time SDE role** to deliver scalable, secure, and testable backend systems from day one.

TECHNICAL SKILLS

Languages:	Java 17 (Core, OOP, Multithreading, Concurrency), SQL
Frameworks:	Spring Boot 3, Spring MVC, Spring Security, Hibernate/JPA
Architecture:	Microservices, RESTful APIs, Distributed Systems, API Gateway, JWT
Security:	RSA-OAEP, AES-256-GCM, Hybrid Encryption, Idempotency, Secure Coding
System Design:	Load Balancing, Caching, API Rate Limiting, Database Indexing, CAP Theorem, Circuit Breaker
Databases:	MySQL, PostgreSQL, H2
Tools:	Docker, Maven, Git, Postman, Swagger
Testing:	JUnit 5, Mockito, Integration Testing

EXPERIENCE

Java Backend Developer Intern — Kaynaz Technologies

Jun 2026 – Jul 2026

Remote · Spring Boot · JWT · Hibernate/JPA · MySQL · Git

- Built and integrated **RESTful APIs** using Spring Boot with **JWT-based authentication**; implemented service-layer logic following clean architecture and SOLID principles for core business modules.
- Worked with **Hibernate/JPA** for ORM and MySQL for data persistence; resolved bugs, maintained Swagger API docs, and delivered features across **Agile sprint cycles** using Git workflows including PRs and code reviews.

Competitive Programming Lead — Google Developer Groups (GDG)

Sep 2025 – Present

Dr. AITD, Kanpur

- Mentored **100+ students** in DSA and interview prep; organised hackathons and workshops growing active participants by **40%**.

Company Outreach & Research Coordinator — T&P Cell

May 2025 – Present

Dr. AITD, Kanpur

- Researched 50+ tech companies and executed LinkedIn/email outreach to HR managers and technical recruiters, strengthening the campus internship pipeline.

PROJECTS

UPI Offline Mesh Payment System

2026

Java 17 · Spring Boot 3 · RSA-OAEP · AES-256-GCM · JPA/H2 · Gossip Protocol · [GitHub](#)

- Engineered a Spring Boot 3 backend for offline UPI payments routed through a gossip-protocol mesh — zero internet required. Used **hybrid RSA-OAEP + AES-256-GCM encryption** to keep packets opaque to relay nodes.
- Solved idempotency via unique packet-hash indexing in JPA with **optimistic locking (@Version)** to prevent double-settlement; built a mesh simulator for full demo without Bluetooth hardware.

Packet Analyzer — Deep Packet Inspection Engine

2025

Java · ExecutorService · BlockingQueue · ConcurrentHashMap · Maven

- BlockingQueue + ExecutorService** producer-consumer pipeline (2 LB + 4 Fast Path threads) parses Ethernet/IP/TCP/TLS headers to extract SNI hostnames from HTTPS traffic — zero external libraries. Configurable rule engine dropped ~10% of test traffic.

Mind Spark — Mental Health Support Platform

Sep 2025 – Present

SIH 2025 Finalist · Spring Boot · MySQL · JWT · Spring Security

- Architected **10+ REST APIs** with JWT auth and RBAC; query optimisation cut response times from ~200ms to under 140ms. Achieved **80%+ test coverage** with JUnit 5 and Mockito.

EDUCATION

B.Tech — Information Technology, AKTU Lucknow

Aug 2023 – May 2027

Dr. APJ Abdul Kalam Technical University · CGPA: 7.1 / 10

ACHIEVEMENTS & CERTIFICATIONS

- SIH 2025 College Finalist** — Mind Spark project
 - Java & Spring Boot — Udemy / NPTEL
- 200+ LeetCode problems (arrays, graphs, DP, trees)
 - HackerRank: Java + Problem Solving badges
